

# Adaptive Release

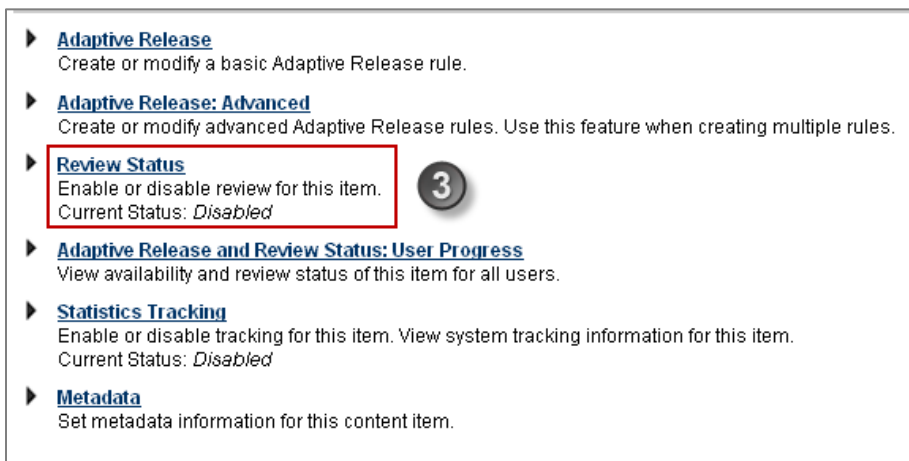

---

## To enable review tracking:

1. Open the **Control Panel** in the course for which you wish to create a review rule.
2. Click on the **[Manage]** button of the module or item that will be tracked.

3. Next click on the **Review Status** link. The **Review Status** dialog box will be displayed.

A screenshot of a dialog box with a list of options. The options are: 'Adaptive Release' (Create or modify a basic Adaptive Release rule.), 'Adaptive Release: Advanced' (Create or modify advanced Adaptive Release rules. Use this feature when creating multiple rules.), 'Review Status' (Enable or disable review for this item. Current Status: Disabled), 'Adaptive Release and Review Status: User Progress' (View availability and review status of this item for all users.), 'Statistics Tracking' (Enable or disable tracking for this item. View system tracking information for this item. Current Status: Disabled), and 'Metadata' (Set metadata information for this content item.). The 'Review Status' option is highlighted with a red border. To the right of the 'Review Status' option, there is a circular icon with the number '3' inside.

4. Click on the **Enable** radio button.
5. Then click on the **[Submit]** button.
